1. INTRODUCTION

- Description of background.
- Explanation of why research was necessary.
- Description of how research will be undertaken.

2. RELATED WORK

3. METHODS

- Overview of the research.
- Report of who took part and where.
- Report of what procedures were used.
- Report of what materials were used.
- Report of any statistical analysis used.

4. RESULTS

- Report of findings.
- Reference to any diagrams used.

5. DISCUSSION

- Summary of main purpose of research.
- Review of most important findings.
- Evaluation of findings.
- Explanation of findings.
- Comparison with other researchers findings.
- Description of implications and recommendations.

6. REFERENCES
